ILLEGIB

MEMORANDUM FOR THE DIRECTOR

SUBJECT: Kissinger Collection Project

1. Attached is a memorandum requested by Dr. Kissinger. As indicated therein, it is an analysis of our present collection activities on enemy logistics moving through south Laos and through Cambodia and a series of recommendations for augmented collection efforts which might help resolve some of our outstanding debates and questions. This package for Kissinger has gone through several drafts. The attached one is, I hope, a final draft. It has been circulated to all members of the ad hoc task force that has been working on this project, with the request of telephonic concurrence to be made no later than 1400 Friday, 18 July. If there are no major substantive objections (there should not be, at this time), I will have any final editorial changes made on the tapes and get the package run with the intent of sending it to the White House by close of business Friday.

2. I would appreciate your looking over this final draft to see if you have any problems or recommendations before we run the printed copy.
